# Godrej Appliances Chatbot Knowledge Base

Prepared 21 October 2026 | Intended for chatbot / RAG ingestion and testing

Scope note: This is a structured website guide, not a complete archive of every model-specific manual.

## Document purpose

This knowledge base is designed for retrieval-augmented generation (RAG), chatbot ingestion, and testing. It summarizes the Godrej Enterprises Group appliance manuals and catalogues directory. It is a navigation guide, not the complete contents of every appliance manual. For model-specific instructions, the exact official manual must be consulted.

## Primary official index

## Washing machine guidance

Choose a manual matching the appliance model and type. The exact manual may describe installation, detergent use, wash programs, control-panel operation, care, troubleshooting, and safety. Do not assume all models have the same controls or programs.

## Deep freezer guidance

Use the matching model manual for installation, ventilation and clearance, temperature controls, loading, cleaning, defrosting, and safe operation. Follow product-specific instructions.

## Refrigerator guidance

The refrigerator resource page identifies manuals/catalogues and warranty resources. Listed manual families include DC Edge Impress, Direct Cool, Frost Free, and Side by Side. Select the family and model that match the appliance.

## Air conditioner guidance

Use the exact model manual for installation requirements, remote-control operation, operating modes, filter maintenance, cleaning, and troubleshooting. Installation and electrical work should follow official instructions and be performed by qualified personnel where required.

## Microwave oven guidance

Use the exact model manual for suitable cookware, operating modes, cleaning, ventilation, and safety. Do not operate a microwave if its door or safety interlocks are damaged. Follow the model-specific manual.

## Customer support

The related Godrej appliance support pages have listed these channels:

Customer care: 080 6743 6743

WhatsApp: +91 9321665511

SMS: Send “Godrejcare” to 56677

Support portal: https://www.godrejenterprises.com/support

Verify current contact details on the official support site before use, as details can change.

## Support portal services

The support portal may provide service-request submission, service-request tracking, escalation, warranty information, product care, service charges, dealer locator, and product enquiry options. Availability can vary by appliance category.

## How to find the correct manual

1. Find the model number on the appliance rating label, sticker, or purchase documents.
2. Open the matching appliance category page.
3. Select a manual whose product family and model match the appliance.
4. Check document revision and warranty information where available.
5. For electrical, refrigerant, sealed-system, or internal repairs, use an authorised or qualified service technician.

## Accuracy and limitations

This knowledge base is a structured summary of the official index and related support navigation. It does not contain every individual manual or the full technical specifications for every product model. Do not invent model-specific values, error codes, warranty terms, installation dimensions, or repair steps. If a user asks for model-specific instructions, ask for the exact model number and direct them to the official manual or support channel.

## Chatbot response rules

- Answer only from facts represented in this knowledge base unless another trusted source is available.
- Distinguish a category landing page from an actual model-specific manual.
- Do not claim that every manual has been downloaded or included.
- For broken links, advise the user to start from the official index page.
- For safety-critical repair instructions, recommend the exact official manual and qualified service support.

- When asked for a specific model's manual, request the model number if missing.
